Ressources naturelles Canada
Service canadien des forêts

Manitoba

The Canadian Forest Service's Northern Forestry Centre is responsible for fulfilling the federal role in forestry research and technology transfer in Alberta, Saskatchewan, Manitoba, and the Northwest Territories. The main objectives are research in support of improved forest management for the economic, social, and environmental benefit of all Canadians.

The Northern Forestry Centre is one of five centers of the Canadian Forest Service, which has its headquarters in Ottawa, Ontario.

Le Service canadien des forêts, Centre de foresterie du Nord, représente le gouvernement fédéral en Alberta, en Saskatchewan, au Manitoba et dans les Territoires du Nord–Ouest en ce qui a trait aux recherches forestières, et au transfert de technologie. Cet organisme s'intéresse surtout à la recherche en vue d'améliorer l'aménagement forestier afin que tous les Canadiens puissent en profiter aux points de vue économique, social et environnemental.

Le Centre de foresterie du Nord constitue l'un des cinq établissements du Service canadien des forêts, dont l'administration centrale est à Ottawa (Ontario).

Bohning, R.A.; Bell, J.L.; Middlebro', W.G.A. 2002. Directory of secondary wood-using industries in Manitoba, 2001. Nat. Resour. Can., Can. For. Serv., North. For. Cent., Edmonton, Alberta.

ABSTRACT

The secondary wood-using industry in Manitoba was surveyed in 2001 by telephone and/or personal interviews with each firm. This directory provides information about each firm (location, telephone number, facsimile number, executive officer, number of people employed, raw materials used in the manufacturing process, and a priority products listing). This information can be accessed through the company name or via the products and services they produce. Information on related organizations and associations is also provided. Survey highlights are included.

RÉSUMÉ

L'industrie de la transformation secondaire du bois du Manitoba a fait l'objet d'une étude en 2001 au moyen d'entrevues personnelles ou téléphoniques auprès de chaque entreprise du secteur. Le présent répertoire fournit de l'information sur chaque entreprise consultée : emplacement, numéros de téléphone et de télécopieur, cadre de direction, nombre d'employés, matières premières utilisées dans le processus de fabrication et liste des principaux produits. Ces données sont classées selon le nom des compagnies et selon les produits et services offerts. Le répertoire fournit également un peu d'information sur des organismes et des associations connexes et présente les faits saillants de l'étude.

DISCLAIMER

The views, conclusions, and recommendations are those of the authors. The exclusion of certain manufactured products does not necessarily imply disapproval, nor does the mention of other products necessarily imply endorsement by the Canadian Forest Service.

INTRODUCTION

This directory lists and describes the firms comprising the secondary wood-using industries in Manitoba for 2001. At that time, 328 secondary wood-using firms provided employment for 13,032 persons. The firms consumed 513.9 million board feet of lumber, 94.2 million square feet of panelboard, and 141.5 thousand tonnes of paper products. Survey highlights of the converted forest products industry are summarized in Tables 1 and 2 and Figure 1 - 3.

The secondary wood-using industries include all firms principally engaged in the further processing of primary wood products, lumber, panel products, and paper. All firms found in this directory can be categorized by their principal products in one of 19 North American Industry Classification System (NAICS) codes as follows:

NAICS CODE	NATIONAL INDUSTRY CLASS
321215	Structural Wood Product Manufacturing
321911	Wooden Window and Door Manufacturing
321919	Other Millwork
321920	Wood Container and Pallet Manufacturing
321992	Prefabricated Wooden Building Manufacturing
321999	All Other Miscellaneous Wood Product Manufacturing
322211	Corrugated and Solid Fibre Box Manufacturing
322212	Folding Paperboard Box Manufacturing
322219	Other Paperboard Container Manufacturing
322220	Paper Bag and Coated and Treated Paper Manufacturing
322230	Stationery Product Manufacturing
322291	Sanitary Paper Product Manufacturing
322299	All Other Converted Paper Product Manufacturing
337110	Wooden Kitchen Cabinet and Counter Top Manufacturing
337121	Upholstered Household Furniture Manufacturing
337123	Other Wood Household Furniture Manufacturing
337127	Institutional Furniture Manufacturing
337213	Wood Office Furniture, Including Custom Architectural Woodwork Manufacturing
337215	Showcase, Partition, Shelving, and Locker Manufacturing

Firms, especially smaller firms, are very flexible in terms of the products they manufacture. They can very quickly shift from one group of manufactured products to another. This makes differentiation between industry classifications difficult. On a product by product basis some firms could be found classified in other closely related NAICS industry codes but were included in this directory as it was felt they better represented the secondary wood-using industry.

The secondary wood-using industries were surveyed by telephone in 2001. The survey requested information on firm location, employment, products by priority, quantity and type of wood or paper materials used, source of wood, species, and value of sales and markets for the year 2000.

A small number of firms declined to participate in the wood using survey. There information is not reported in this directory.

The directory also provides information on organizations and associations relevant to the secondary wood-using industries. A table of metric conversion factors is also included.

The purpose of this directory is to:

1. characterize the secondary wood-using industry in terms of its importance to the economy of Manitoba;

2. identify possible markets for Manitoba's primary wood products;

3. assist buyers to purchase Manitoba manufactured goods;

4. bring buyers and sellers together;

5. show "who's who" in the secondary wood-using business; and

6. generate a greater public awareness of Manitoba's wood products.

The Canadian Forest Service has also published the *Directory of primary wood-using industries in Manitoba, 2001,* which is available free of charge from:

ABBREVIATIONS AND TERMS USED IN THIS DIRECTORY

General:

MDF	medium density fiberboard
OSB	oriented strandboard
n/a	not applicable or unavailable
SBS	solid bleached sulphite paper
RTM	ready to move homes

Tree Species:

S-P-F	spruce, pine, fir
wS	white spruce
jP	jack pine
rP	red pine
wP	eastern white pine
PnP	ponderosa pine
lP	lodgepole pine
eC	eastern red cedar
wC	western red cedar
tL	tamarack/larch
DgFr	Douglas-fir
hem/fir	western hemlock, red, grand, noble, silver and white fir
wB	white birch
tA	trembling aspen
bPo	balsam poplar
oak	red and white oak
mxdhwd	mixed hardwoods, including hickory, alder, ramin, mahogany, walnut, basswood and others
Mixed softwoods	ponderosa pine, tamarack/larch, eastern red cedar and others

Table 1.

Consumption of Forest Products by Secondary Wood-using Industries in Manitoba in 2001

Lumber

- 513.9 million board feet
  - Includes all sizes, both softwoods and hardwoods.

Wood-based Panelboards - sheet material

- 94.2 million board feet
  - Includes both structural and non-structural panels, such as plywood, hardwood faced panels, particleboard, melamine, laminated faced panels, oriented strandboard, fiberboard and medium density fiberboard.
  - Sheet materials in all thicknesses

Paper and Pulp Material

- 141,500 tonnes
  - Includes roofing felts, corrugated paper, liner board, box board, clay coated newsback, solid bleached sulphite, white papers, as well as recycled newsprint.

Table 2.

Size of Firms in Secondary Wood-using Industries in Manitoba in 2001

Size of firm by number of employees	Number of firms (% of total)	Number of employees (% of total)
1 - 4	148 (45.1)	299 (2.3)
5 - 9	55 (16.8)	362 (2.8)
10 - 19	41 (12.5)	552 (4.2)
20 - 49	45 (13.7)	1,353 (10.4)
50 - 99	18 (5.5)	1,161 (8.9)
100- 999	18 (5.5)	2,955 (22.7)
1,000 +	3 (0.9)	6,350 (48.7)
Total	328 (100)	13,032 (100)

HOW TO USE THIS DIRECTORY

Section I Listing of Firms

This consists of a listing of firms in alphabetical and numerical order. Included in this section are the name, address, executive officers, telephone number, facsimile (fax) number, staff size, products manufactured by the firm, and raw materials used by the firm in the manufacture of their products.

Up to six products manufactured by the firm are listed in order of importance to each firm (from highest to lowest). Product wording, in some cases, has been changed slightly to conform to the overall product list.

Raw materials have been grouped into three types: lumber, panelboard, and paper products. Each type may have four species or different kinds of product identified. Materials are not listed in any order of priority.

Section II Listing of Firms by Products and Services

Information is arranged by products and services. It provides an alphabetical listing of products and services of the firms. If a firm produces a number of different products or services, it will be listed under each of the appropriate product headings. Firms can be located in Section 1 by number.

We regret any errors in or omissions from this directory. If your firm is unlisted or listed incorrectly in this directory, please notify the Canadian Forest Service in Edmonton regarding corrections. Thank you.

SECTION I

LISTING OF FIRMS

1. A & K Millwork Ltd.

1675 Inkster Boulevard
Winnipeg, MB R2X 2W7

Executive Officer: Andy Kraljevic

Telephone: (204) 633-0211

Fax: (204) 697-0600

Web site: www.akmillwork.com

APPENDIX III

Metric Conversion Factors for Selected Forestry Units

Manitoba Forestry Factors for Metric Conversion

These conversion factors are used by the Manitoba Forestry Branch for official standard timber conversion and depletion factors.

Equivalency			Equivalency		
1 inch	=	2.54 centimetres	1 centimetre	=	0.394 inches
1 foot	=	0.3048 metres	1 metre	=	3.281 feet
1 yard	=	0.9144 metres	1 metre	=	1.0936 yards
1 chain (66 ft)	=	20.1168 metres	1 metre	=	0.0497 chains (66 feet)
1 mile	=	1.609 kilometres	1 kilometre	=	0.621 miles
1 square foot	=	0.092903 square metres	1 square metre	=	10.764 square feet
1 acre	=	0.4047 hectares	1 hectare	=	2.471 acres
1 square mile	=	2.590 square kilometres	1 square kilometre	=	0.386 square miles
1 cubic foot	=	0.0283 cubic metres	1 cubic metre	=	35.3147 cubic feet
1 gallon	=	4.546 litres	1 litre	=	0.220 gallons
1 cubic foot/acre	=	0.070 cubic metre/hectare	1 cubic metre/hectare	=	14.913 cubic feet/acre
1 pound	=	0.4536 kilograms	1 kilogram	=	2.2046 pounds
1 ton	=	0.907 tonnes	1 tonne	=	1.102 tons

Selected Conversion Factors for Forest Products

Product	Imperial Measure Content	Metric Content
Pulpwood and fuelwood	1 cord (100 inch bolts)	2.5 m^3 (approximate) 3.77 m^3 (stacked)
Lumber	1000 fbm	5.66 m^3 8.55 m^3 (stacked)
Hydro poles	19 ft^3 per pole	0.54 m^3 per pole
Railway ties	5 ft^3 per tie	0.14 m^3 per tie
Fence posts to 9 feet	1.0 ft^3 per post	0.03 m^3 per post
Fence posts to 19 feet	1.5 ft^3 per post	0.04 m^3 per post
Fence rails (not exceeding 5 inches in diameter at butt end × 16 feet long)	10 ft^3 per 100 lineal feet	0.04 m^3 per rail
Round timber		
7 inch butt end	15 ft^3 per 100 lineal ft	0.42 m^3 per 30.5 lineal m
9 inch butt end	30 ft^3 per 100 lineal ft	0.85 m^3 per 30.5 lineal m
12 inch butt end	60 ft^3 per 100 lineal ft	1.70 m^3 per 30.5 lineal m
12+ inch butt end	100 ft^3 per 100 lineal ft	2.83 m^3 per 30.5 lineal m

Source: Manitoba Conservation, Forestry Branch.

Other Forestry Conversions

The conversion factors shown below are approximate values and may vary in other areas. These conversions are generally used in Manitoba.

1 bone dry unit (BDU) 2400 lb (wood chips)	=	1090 kg
1 oven dry unit (ODT) 2204 lb (wood chips)	=	0.918 BDU
1 oven dry tonne wood chip weight to volume conversion	=	2.5963 m^3
1 unit (hog fuel)	=	200 ft^3 or 72 ft^3 of solid wood
1000 ft^2 of sheet product (3/8" basis)[1]	=	0.844 m^3
1 cunit (100 ft^3)	=	2.83 m^3 roundwood
2 cunits of roundwood	=	1000 fbm
1 ft^3 of roundwood	=	5 fbm

[1] Industry standards show plywood product in thousands of square feet based on 3/8" thick panels and particleboard in thousands of square feet based on 3/4" panels (One 4' × 8' sheet of panel 3/8" thick contains 1 ft^3 of material). Production equivalents in metric units are usually given in cubic meters (m^3) regardless of the sheet thickness.

Source: Manitoba Conservation, Forestry Branch.

APPENDIX IV

Grading Notes

GRADING NOTES

Grading of Lumber for Value-Added Manufacturing

The purpose of grading rules is to maintain a measure of value among sawmills that manufacture the same or similar woods, resulting in uniform qualities. In general, a softwood board is graded as a whole piece, while a hardwood board is graded on its usable content aside from any parts that may be considered undesirable. Factory lumber is graded from the poorer face of the board for both hardwoods and softwoods. Provisions of grading rules may be set aside by mutual agreement of buyer and seller.

Summary of Hardwood Grading Rules for Factory Lumber

Grade	Minimum Width (in.)	Length Range[a] (ft)	% Clear Length Face[b]	Minimum Clear Cutting Size (in. X ft)
First	6	8 – 16	91 2/3	4 x 5 or 3 x 7
Second	6	8 – 16	83 1/3	4 x 5 or 3 x 7
Select	4	6 – 16	91 2/3	4 x 5 or 3 x 7
No. 1 Common	3	4 – 16	66 2/3	4 x 2 or 3 x 3
No. 2 Common	3	4 – 16	50	3 x 2

[a] Measured in 1- foot increments.
[b] Percentage of the poor face to be made of clear cuttings.

Summary of Softwood Grading Rules for Factory Lumber

(lengths 4' and longer, 1-foot increments)

Width of Lumber	Length of Cutting	Width of Cutting	Quality
9 1/2" and wider	18"	9 1/2"	Clear both sides
5" and wider	3'	5"	"B" Industrial
<5"	3'	full width	"B" Industrial

Grade	% of Piece Containing Cuttings
Select	70% and greater
No. 1	50 – 70%
No. 2	33 1/3 – 50%

Kiln Drying Standards

- *Construction Dry* has a moisture content of 19%. This applies to softwood dimension lumber.
- *Industrial Dry* has a moisture content of 10 - 12%. This applies to softwood used in value-added manufacturing such as wood windows.
- *Specialty Dry* has a moisture content of 6 – 8%. This applies to hardwoods used in value-added wood manufacturing such as residential wood furniture and flooring.

Typical Lumber Thicknesses Used in Value-Added Wood Manufacturing

(most frequently hardwood species and pine are used)

Description	Specialty Dry	Green
4/4	1"	1 1/16"
5/4	1 1/4"	1 3/8"
6/4	1 1/2"	1 5/8"
8/4	2"	2 1/8"

ACKNOWLEDGMENTS

Sincere appreciation goes to all persons who contributed information to make this directory possible, especially the owners and managers of the secondary forest products industry in Manitoba. Their contribution is gratefully acknowledged.

We wish to thank Paul Mackin of Manitoba Industry, Trade and Mines and his staff for assistance in gathering data on firms.

The authors wish to thank Karen Gervais and Randal Hoscheit for entering the data and editing assistance. Appreciation is also extended to Kelly Petkau (Canadian Forest Service) for his computer programming assistance.

Funding assistance was provided by the Manitoba Government; this contribution is gratefully acknowledged.
